

Our products

Safetrans manufactures dunnage bags that prevent your goods from getting damaged during transit.

We produce all strengths and sizes you need with a Standard or Fast Fill valve. We also provide supplementary inflators.

Our dunnage bags made top-to-bottom with the only fully automated production lines in the world.

This guarantees consistent high quality products.

Material	Size (cm)	Strength	Valve
Kraft	90 x 120	Light	Standard
Paper	90 x 150	Medium	Fast Fill
	90 x 180	Heavy	
	90 x 210	Heavy Duty	
	60 x 90	Level 1	
Woven Polypropylene	60 x 120	Level 2	Fast Fill
	90 x 90	Level 3	
	90 x 120	Level 4	
	90 x 150	Level 5	
	90 x 180		
	90 x 210		
	120 x 120		
	120 x 240		
	120 x 270		

Please note: different sizes can be offered with different strengths, for example: 90 x 120 Light or 90 x 120 Heavy

Safetrans Dunnage Bags

Our dunnage bags are made of a polyethylene inner bag and a kraft paper or woven polypropylene outer bag.

The inner bag ensures that a bag remains airtight. The outer bag provides strength.

Each type should be used in a specific situation. We will advise you on which bag to use. This way the most secure and cost-effective situation is created.

Kraft Paper

- ✓ Easier to handle
- ✓ Standard or Fast Fill valve
- ✓ Light, Medium, Heavy or Heavy Duty
- ✓ Width (cm) 90
- ✓ Length (cm) 120, 150, 180, 210

Woven Polypropylene

- ✓ More resistant against sharp objects
- ✓ Fast Fill valve
- ✓ Level 1, 2, 3, 4 or 5
- ✓ Width (cm) 60, 90 or 120
- ✓ Length (cm) 90, 120, 150, 180, 210, 240, 270

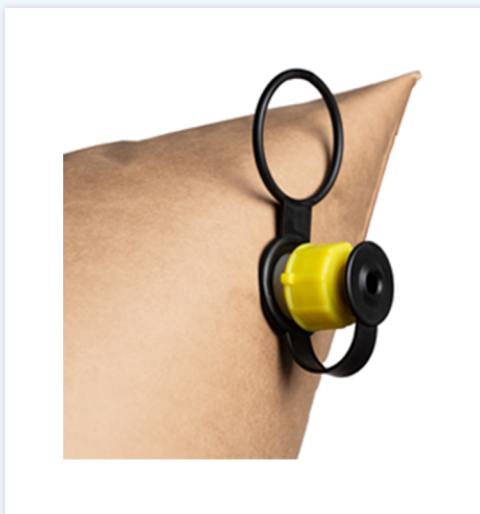

Safetrans Valves

The valve of a dunnage bag should be easy to use, fast to inflate and deflate, reliable and cost-effective. We've developed two valves that fit these criteria: Standard and Fast Fill.

The Standard valve is the most cost-effective solution. The Fast Fill valve the fastest.

Standard

✓ Most cost-effective

Fast Fill

- ✓ More user-friendly
- ✓ Shorter inflation time
- ✓ Less compressed air needed

Safetrans Inflators

Each valve and loading situation requires its own inflator. We offer five types: P100, P100FF, P1000, i5055, P1000E.

Based on our expertise and your needs, we will make sure you use the right product.

P100

The P100 is used for our Standard valve.
Cost-effective and easy to use.

P100FF

Our fast inflator for the standard valve.
Quicker inflation than the P100.

i5055

Easy to use when there is little room in between loads.

P1000

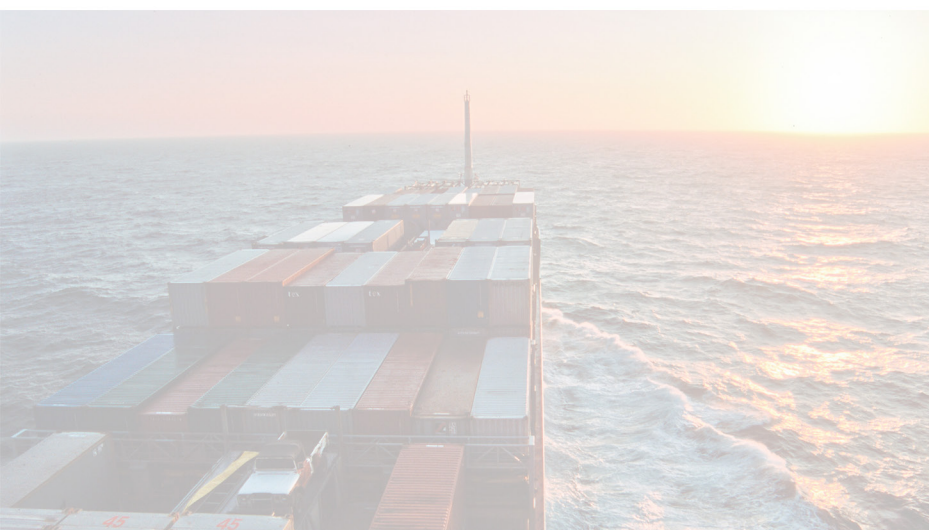

Applied to our Fast Fill valve.
Inflates very fast and uses less compressed air.

P1000E

Fully electric inflator for our Fast Fill valve.
Inflates up to 30 bags with one battery.
